-Special price lists-

Dear Customer:

I have just received the following plants from India. They are all large, beautiful specimens. The plants will be shipped to you out of pots, just as I have received them.

Cultural instructions will be furnished with each plant. I suggest that you order at once so the plants will be out of pots for the shortest possible length of time. Those that are not ordered within one week I will pot for my own use and later sale, and of course the plants will cost more when potted and established.

Cypripedium insigne: A light green bloom shaded with brown and having numerous brown spots. An easy variety to grow, having been used as house plants in Europe for many years. January to March is the blooming period. \$5.00 each.

Cypripedium insigne var. Harfield Hall: One of the best of the *Cypripedium* family. Flowers are large, similar in color to *insigne* but with white margin on dorsal sepal. Winter is the blooming period. \$7.50 Ea.

Cypripedium Fairieanum: One of the most attractive of the species. Flowers about three inches wide of green striped with violet. Lip is white at base and green at apex. September and October is the blooming period. \$5.00 each.

Dendrobium nobile: Flowers in groups of two or three, white at base with amethyst tips. One of the best of the species. Spring and early summer is the blooming period. \$4.50 each.

Dendrobium formosum: Flowers in groups of three to five, white except for yellow green blotch on the lip. Fall is the blooming period \$4.50 Ea.

Phaius Wallichii: Flowers are large, white externally, buff shaded with red on the inner surfaces. Lip is white with yellow disc lined with red. Winter and spring is the blooming period. \$4.00 each.

Plants are ready for shipment now. Terms: Cash with order, f.o.b. Monroe, and all plants are shipped express collect unless otherwise requested.
